As we come to the end of another year, Dr. Vimi PS memorial charitable society will be 5 years old in 2019 and already we have crossed many milestones and achieved a great deal..

I look back with pride on what the organization has achieved in the past year, and I would like to usher in another year of working with renewed vigour and energy towards our goals for the development of the differently abled children, their families and for their wellness.

Enhancement through proper guiding and health care programs enters into its 5th year with a remarkable confidence. With sharpened clarity on approach and improved knowledge and talent base, the organization is poised to leap ahead to cover other untouched marginalized children. With the turn of this year, we feel proud to present its Annual Report 2018-19, which provides you a glimpse of what we did and achieved this year through our synergized effort.

MESSAGE FROM OUR PATRON

Dr. K K Purushothaman, MBBS. MD Dch,
Head of the Department (Paediatrics),
Gov. Medical college, Thrissur.

“A person's asset is not just a head full of knowledge, but a heart full of kindness, ears ready to listen and a hand willing to help others.”

This Organization was established in 2014 in memory of Dr.Vimi who was my dear student. Her batch mates '21st Flemings' who are a group of humanitarians and eminent doctors in their respective fields came up with idea of such a centre with thorough support of Vimi's family members. With time, it has evolved into a credible centre for rehabilitation of children with cerebral palsy and other developmental disorders.

Here, children are given the facility for Physiotherapy , occupational therapy, speech therapy and are regularly assessed by a team of doctors specialized in pediatrics, orthopedics and other specialties. In addition, they conduct annual medical camps, and other social activities.

Last year, CME on cerebral palsy was also held by this organization which was an academic treat and witnessed an enthusiastic turn out.

The centre provides early intervention for children with developmental disabilities and also trains the parents with skills to manage their children at home. A team of skilled professionals serve here with due emphasis on improvement in muscle tone, spasticity, cognition and quality of life. Popularly known as 'Vimi centre' this offers a helping hand to the needy, empowering differently abled children and bringing back them to life. I wish them continued success in the years to come.
